This manual is provided as a guide for specifying range hoods and components for new construction and remodeling applications.

The information contained herein is intended for authorized dealers and their clients. Proper care and safety should be used when working with tools or installing electrical components.

The materials used to produce the products in this manual are of the highest quality available. The construction methods and joinery employed are in accordance with standards established by the

KCMA
(Kitchen Cabinet Manufacturers Association).

These fine products are sanded and ready to be finished.

The dimensional information contained here is deemed to be accurate at the time of printing. Castlewood reserves the right to change specifications without notice. For access to the most current information, please visit www.castlewood.com.

T-Shape Steel Hood Liners

Item #	Dimensions (h) x (w) x (d)
HLT30	4" X 29-7/8" X 16-3/8"
HLT36	4" X 35-7/8" X 16-3/8"
HHARKPM21	6" to 7" Round Transition
HVASDK	for 6" Round Duct
HSCF124	Charcoal Filter for Ascension
HS99010464	Charcoal Filter for Broan

*HHARKPM21 works with HV300SS,
HV400SS and HV600SS units.
HVASDK works with HVA350SL,
HVA350SS and HVA500SS units.*

- Cold Rolled Steel Construction with Silver Metallic powder coated finish
- For use in all Range Hood FRONTS
- Accepts the Ascension, Broan and Castlewood ventilators listed below:
- HV300SS
- HVA350SL
- HVA350SS
- HVC390SS
- HV400SS
- HVA500SS
- HV600SS
- HVA620SS

Recirculating Kits

HHARKPM21

HVASDK

Rectangular Steel Hood Liners

- Cold Rolled Steel Construction with Silver Metallic powder coated finish or Stainless Steel (SS430)
- For use in all full Box, Chimney and Mantel style range hood configurations
- Accepts the Ascension, Broan and Castlewood ventilation units listed below:
- HV300SS
- HVA350SL
- HVA350SS
- HVC390SS
- HV400SS
- HVA500SS
- HV600SS
- HVA620SS

Item #	Dimensions (h) x (w) x (d)
HLB30	4" x 28-21/64" x 18-1/8"
HLB36	4" x 34-21/64" x 18-1/8"
HLB42	4" x 40-21/64" x 18-1/8"
HLB48	4" x 46-21/64" x 18-1/8"

Large Ventilator Steel Hood Liners

HLZ30

HLZ36

- Stainless Steel Construction (SS430).
- For use in all full Box, Chimney and Mantel style range hood configurations
- HLZ30 and HLZ36 accept HVC600SS and HVA900SS units only

Large Ventilator Steel Hood Liners

HLZC42

HLZC48

- Stainless Steel Construction (SS430).
- For use in all full Box, Chimney and Mantel style range hood configurations
- HLZC42 and HLZC48 accept HVC600SS and HVA900SS units only

Large Ventilator Steel Hood Liners

HLZ42

HLZ48

- Stainless Steel Construction (SS430).
- For use in all full Box, Chimney and Mantel style range hood configurations
- HLZ42 and HLZ48 accept HVA1200SS units only

Ascension 350 CFM Economy Ventilator

SPECIFICATION SHEET

FEATURES

- Silver Metallic Powder Coated Finish
- 3 Speed motor
- 350 CFM
- 6" Outlet (Transition piece with backdraft damper to round ducting included)
- 2 Directional Lights
- LED (3 watt) lamps included (GU10)
- Aluminum Mesh Filter (dishwasher safe)
- Power supply cord included
- Push Button Controls
- 1 Year Warranty
- Use with HLB or HLT series Liners
- Will accommodate cook-tops with up to 35,000 BTU output

TYPICAL SPECIFICATION

Power Pack shall be Ascension model HVA350SL

Power pack shall have a multi-speed fan switch and separate light switch.

Fan may be ducted externally or redirected via a ductless conversion kit (sold separately).

Fan must be equipped with Aluminum Mesh Filter.

Air delivery to be at least 350 CFM.

Unit shall be ETL listed.

AUTOMATIC MAKE-UP AIR DAMPER

Broan's Automatic Make-up Air Damper provides interlocked damper operation so outside air is only allowed to enter the house when a connected fan or hood is operating.

Model MD6T (for 6" round duct)

Model MD8T (for 8" round duct)

- 24 Volt, 60 Hz AC motor
- Normally closed damper
- Automatically opens when exhaust fans are activated
- Foam seals minimize air leakage
- 24 gauge galvanized steel construction
- Damper adjustment screw for balancing adjustments
- Compatible with select Broan and Ascension ventilation units
- Use with Fresh Air Inlet Model 641FA for 6" dampers, Fresh Air Inlet Model 643FA for 8" dampers (sold separately)
- Includes 24 Volt 20VA transformer

models

Chimney Hood Mounting Instructions

CHIMNEY RANGE HOOD INSTALLATION INSTRUCTIONS:

- 1) Locate available studs in area where the Chimney Range Hood is to be installed.
- 2) Align Chimney Range Hood so at least two screws will be secured through each mounting strip and into the available studs.
- 3) Refer to manufacturers guidelines that accompany stove/cook-top that will be located beneath Chimney Range Hood.
- 4) Exposed wood edges should be no less than 30" above cooking surface.
- 5) Attach mounting strip (included) to wall using #8 x 2-1/2" framing screws.
- 6) Hang Chimney Range Hood on mounting strip and secure to wall using minimum #8 x 2-1/2" framing screws.
- 7) Install ventilation power pack into steel liner as outlined in ventilator instructions.
- 8) Mount liner/ventilator assembly to inside of hood opening using available mounting holes and secure unit with wood screws (#6 x 1/2").
- 9) Install ductwork or ductless kit according to ventilation manufacturer's guidelines.
- 10) To install Chimney Extension over ductwork the back stretchers may have to be cut. Cut away just enough of the stretcher to fit around the ductwork.
- 11) Secure the Chimney Extension to the Chimney Hood by toe nailing the base of the extension to the hood with brad nails.

Shiplap Chimney Mounting Instructions

SHIPLAP CHIMNEY RANGE HOOD INSTALLATION INSTRUCTIONS:

- 1) Remove Shiplap Chimney Extension (shipped inside of Chimney Hood).
- 2) Locate available studs in area where the Shiplap Chimney Range Hood is to be installed.
- 3) Align Shiplap Chimney Range Hood so at least two screws will be secured through each mounting strip and into the available studs.
- 4) Refer to manufacturers guidelines that accompany stove/cook-top that will be located beneath Shiplap Chimney Range Hood.
- 5) Exposed wood edges should be no less than 30" above cooking surface.
- 6) Attach mounting strip (included) to wall using #8 x 2-1/2" framing screws.
- 7) Hang Shiplap Chimney Range Hood on mounting strip and secure to wall using minimum #8 x 2-1/2" framing screws.
- 8) Install ventilation power pack into steel liner as outlined in ventilator instructions.
- 9) Mount liner/ventilator assembly to inside of hood opening using available mounting holes and secure unit with wood screws (#6 x 1/2").
- 10) Install ductwork or ductless kit according to ventilation manufacturer's guidelines.
- 11) Trim Shiplap Chimney Extension to desired height.
- 12) To install Chimney Extension over ductwork the back stretchers may have to be cut. Cut away just enough of the stretcher to fit around the ductwork.
- 13) Secure the Chimney Extension to the Chimney Hood by toe nailing the base of the extension to the hood with brad nails.

Removable Access Mounting Instructions

REMOVABLE ACCESS RANGE HOOD INSTALLATION INSTRUCTIONS:

- 1) Locate available studs in area where the Removable Access Range Hood is to be installed.
- 2) Align the Lower section of the Range Hood so at least two screws will be secured through the back and into each of the available studs.
- 3) Refer to manufacturers guidelines that accompany stove/cook-top that will be located beneath Chimney Range Hood.
- 4) Exposed wood edges should be no less than 30" above cooking surface.
- 5) Attach Lower Section of the Range Hood to wall using #8 x 2-1/2" framing screws.
- 6) Check to make sure Lower Section is secure before proceeding.
- 7) Install steel liner and ventilator in accordance with manufacturer's guidelines.
- 8) Mount liner/ventilator assembly to inside of hood opening using available mounting holes and secure unit with wood screws (#6 x 1/2").
- 9) Attach appropriate ducting and wiring in accordance with manufacturer's guidelines.
- 10) At this time the assembly is ready to be inspected in accordance with local building codes.
- 11) Slide Upper Section of the Range Hood over the Lower Section.
- 12) The two sections should nest with the decorative molding covering the seam between sections.
- 13) Using brad nails, fasten the upper section to lower section through the decorative molding.
- 14) To install Chimney Extension over ductwork the back stretchers may have to be cut. Cut away just enough of the stretcher to fit around the ductwork.
- 15) Secure the Chimney Extension to the Chimney Hood by toe nailing the base of the extension to the hood with brad nails.

Removable Access Upper Section

Removable Access Lower Section

Island Hood Mounting Instructions

HARDWOOD ISLAND CHIMNEY HOOD MOUNTING INSTRUCTIONS

CAUTION:

Mounting a Chimney style Hardwood Range Hood over an Island is a complex application. It is highly recommended that an experienced carpenter be consulted before installing to ensure proper structural support be employed to securely hang the island range hood from the ceiling. A completely assembled Hardwood Range Hood with a Liner and Ventilator unit installed will be very heavy. This is not a job for one person alone to attempt.

Materials Needed

Hardwood Island Range Hood
Range Hood Liner and Ventilation unit
(4) 2" x 2" x 24" Studs
#10 x 3" Wood Screws
#8 x 2" Wood Screws
Drill and Drill Bits
Ductwork
Nail Gun and 2" x 16 gauge nails

Stud Finder
Level
Tape Measure
Pencil
Screwdriver
Ladder
UL Listed Duct Tape
Electrical Outlet, Wiring, etc.

Step 1)

Locate the place above the cooktop where the Chimney Hood is to be hung.

Using a Stud Finder, locate the ceiling joists and mark the location with a pencil.

Trace a square or rectangle on the ceiling in the area of the joists equal to the inside dimensions of the Chimney Hoods Chimney Extension. Make sure that the ceiling joists (2) are inside the tracing.

Carefully cut out the drywall in the traced area to expose the ceiling joists.

Remeasure the opening to make sure that it matches the inside dimension for the Chimney Extension.

Step 2)

Using the 2" x 2" x 24" studs, screw one stud into the ceiling joist in each corner of the opening using #10 x 3" wood screws. Align the studs so that at least 6"- 8" of each are attached to the joist above and the remainder of the length is hanging down. Remeasure to make sure that the outside dimension of the protruding studs equals the inside dimension of the Chimney Extension. See figure 1.

Step 3)

It is now time to install an electrical outlet inside the opening above where the Chimney Hood is to be hung. A dedicated 20 amp circuit is recommended. Consult a electrician for proper wiring.

Step 4)

This is when the ducting will need to be fed thru the opening and connected from above. You will need to use Semi-Rigid Metal Ducting that can expand and contract. Once the ducting is connected above using UL Listed Duct Tape, carefully extend the ductwork downward and leave hanging approximately two feet below the opening in the ceiling above. Once the Chimney Hood is installed, you will connect the exposed ductwork to the outlet on the ventilation unit.

Figure 1

Island Hood Mounting Instructions

Step 5)

Slide the Chimney Extension up and over the exposed studs until it is flush with the ceiling. Fasten securely along the length of each stud with 2" x 16 gauge nails or 2" wood screws. You will be fastening from the inside of the chimney extension, thru the studs and into the chimney extension itself. This is done so you will not mar the exterior of the chimney extension. It is very important to make sure that the studs are securely mounted to the joists above and that the Chimney Extension is securely fastened to the studs. This assembly will be holding all the weight of the Chimney Hood body and ventilation system. Failure to securely fasten both the studs and the chimney extension could result in serious injury or damage to the cooktop below. See figure 2.

Once the Chimney Extension has been securely fastened you will be ready to attach the Island Hood body.

Step 6)

You will need two additional people to complete this step. Lift the hood body up over the exposed studs until it is flush with the bottom of the installed chimney extension. Securely fasten the hood body to the exposed studs using 2" x 16 gauge nails or 2" wood screws. You will be fastening from the inside of the hood body, thru the exposed studs and into the hood itself. You are doing this to not mar the finish of the island hood body. It is very important to use enough nails or screws to securely fasten the hood body to the support structure. Take some care to position each nail so you do not puncture the body of the island hood. See figure 3.

Once the hood body has been securely fastened to the support structure, you are ready to install the ventilation system per the manufacturers instructions.

Please note:

This is a guideline to assist in the mounting of a hardwood chimney style range hood above an island cooktop. The manufacturer assumes no liability for injury or damage due to faulty installation. Consult you local building codes and a qualified carpenter, electrician, and hvac professional to ensure a proper and safe installation.

Range Hood Front Mounting Instructions

CHIMNEY RANGE HOOD FRONT INSTALLATION INSTRUCTIONS:

- 1) Chimney Range Hood Fronts are designed to be mounted between two wall cabinets.
- 2) Mount wall cabinets as outlined by manufacturer allowing 1/8" more space than the specified range hood width (i.e.; for 30" hood front use 30-1/8" spacing).
- 3) Exposed wood edges should be no less than 30" above cooking surface.
- 4) Drill 2-3 pilot holes horizontally through wall cabinet face frame on each side where range hood front is to be mounted.
- 5) Mount Ventilation Power Pack securely to T-Shaped Steel Liner as outlined in ventilator instruction packet.
- 6) Choose appropriate height and locate Liner/Ventilator assembly between two adjacent wall cabinets so that liner is a minimum of 30" above cooking surface and touching rear wall. The narrow portion of the T-Liner is to be facing forward with the ventilator duct opening pointed up.
- 7) Secure Liner/Ventilator assembly to adjacent wall cabinets with wood screws. Use two screws on each side (#6 x 1/2").
- 8) Fasten Liner assembly to rear wall, screwing into studs where available. If studs are not available, install using drywall anchors.
- 9) Install duct work or ductless kit to ventilator power pack according to manufacturer's guidelines.
- 10) Fit Chimney Range Hood Front into opening between adjacent wall cabinets so it is flush with wall cabinet face frame and covering Liner/Ventilator assembly.
- 11) Secure Chimney Range Hood Front to adjacent wall cabinets on both sides using framing screws (#8 x 2-1/2").

Mantel Hood Mounting Instructions

MANTEL RANGE HOOD INSTALLATION INSTRUCTIONS:

- 1) Remove range hood from carton.
- 2) Remove detachable panel (*if applicable*) by grabbing top of panel and pulling forward. Be sure to hold the panel securely to prevent dropping and any resulting damage.
- 3) Locate available studs in area where the Mantel Range Hood is to be installed.
- 4) Measure for desired height keeping in mind that exposed wood edges should be no less than 30" above cooking surface.
- 5) Align mounting strip with beveled edge pointing up and away from wall so that desired installed height of range hood is achieved.
- 6) Secure mounting strip to wall with at least two #8 x 2-1/2" framing screws.
- 7) Lift and hang range hood on mounting strip and finish by installing at least two framing screws thru each plywood mounting rail on back of range hood and into available wall studs.
- 8) Be sure that range hood is securely fastened to wall before attempting to install ventilation unit.
- 9) Install ventilation power pack into steel liner as outlined in ventilator instructions.
- 10) Mount liner/ventilator assembly to inside of hood opening using available mounting holes and secure unit with wood screws (#6 x 1/2").
- 11) Install ductwork or ductless kit according to ventilation manufacturer's guidelines.
- 12) Reinstall detachable panel (*if applicable*) by first seating panel bottom on top of mantel shelf, then aligning clips and applying pressure, first at bottom and then at the top, being careful to keep fastening clips aligned throughout.
- 13) Rehang doors (*if applicable*).

Mantel Hood Front Mounting Instructions

MANTEL RANGE HOOD FRONT INSTALLATION INSTRUCTIONS:

- 1) Mantel Range Hood Fronts are designed to be mounted between two wall cabinets.
- 2) Mount wall cabinets as outlined by manufacturer allowing 1/8" more space than the specified range hood width (i.e.; for 30" hood front use 30-1/8" spacing).
- 3) Exposed wood edges should be no less than 30" above cooking surface.
- 4) Drill 2-3 pilot holes horizontally through wall cabinet face frame on each side where range hood front is to be mounted.
- 5) Mount Ventilation Power Pack securely to T-Shaped Steel Liner as outlined in ventilator instruction packet.
- 6) Choose appropriate height and locate Liner/Ventilator assembly between two adjacent wall cabinets so that liner is a minimum of 30" above cooking surface and touching rear wall. The narrow portion of the T-Liner is to be facing forward with the ventilator duct opening pointed up.
- 7) Secure Liner/Ventilator assembly to adjacent wall cabinets with wood screws. Use two screws on each side (#6 x 1/2").
- 8) Fasten Liner assembly to rear wall, screwing into studs where available. If studs are not available, install using drywall anchors.
- 9) Install duct work or ductless kit to ventilator power pack according to manufacturer's guidelines.
- 10) Fit Mantel Range Hood Front into opening between adjacent wall cabinets so it is flush with wall cabinet face frame and covering Liner/Ventilator assembly.
- 11) Secure Chimney Range Hood Front to adjacent wall cabinets on both sides using framing screws (#8 x 2-1/2").
- 12) Install doors or decorative panels using hinges or false front clips (H-1083).

Box Hood Mounting Instructions

BOX RANGE HOOD INSTALLATION INSTRUCTIONS:

- 1) Remove range hood from carton.
- 2) Remove detachable panel (*if applicable*) by grabbing top of panel and pulling forward. Be sure to hold the panel securely to prevent dropping and any resulting damage.
- 3) Lift upper hood section up and off hood base assembly and set aside.
- 4) Locate available studs in area where the Box Range Hood is to be installed.
- 5) Measure for desired height keeping in mind that exposed wood edges should be no less than 30" above cooking surface.
- 6) Secure range hood base to wall studs with at least four #8 x 2-1/2" framing screws.
- 7) Be sure that range hood is securely fastened to wall before attempting to install ventilation unit.
- 8) Install ventilation power pack into steel liner as outlined in ventilator instructions.
- 9) Mount liner/ventilator assembly to inside of hood base opening using available mounting holes and secure unit with wood screws (#6 x 1/2").
- 10) Install ductwork or ductless kit according to ventilation manufacturer's guidelines.
- 11) Install upper hood section by lifting and placing on top of the mounted box range hood base.
- 12) Upper box hood section should nest with base assembly. Be sure that top section is aligned with base and flush with back wall.
- 13) Reinstall detachable panel (*if applicable*) by first seating panel bottom on top of mantel shelf, then aligning clips and applying pressure, first at bottom and then at the top, being careful to keep fastening clips aligned throughout.

HVASDK Recirculating Kit

INSTALLATION INSTRUCTIONS

HVASDK RECIRCULATING KIT FOR OUT THE TOP VENTING

USED WITH HVA350SL, HVA350SS, HVA500SS POWER PACKS

(Consult local building codes)

- 1) Install HVA350SL, HVA350SS or HVA500SS per installation instructions shipped with unit.
- 2) Remove aluminum filter or baffle filter and insert **charcoal filter** (HSCF124), reposition aluminum filter or baffle filter over charcoal filter and snap into place.
- 3) Connect **6" Round Flexible Metal Duct Pipe** to backdraft damper with UL listed aluminum foil duct tape. Pipe may need to be trimmed to desired length.
- 4) Connect Straight **Stack Boot** to top of 6" diameter duct pipe. Secure with UL listed aluminum foil duct tape.
- 5) If chimney hood being mounted includes **Chimney Extension**, install extension. A plywood cap may be needed on top of the chimney extension to keep stack boot in place. Cut a 4" x 10" opening in plywood cap aligned with location of stack boot opening.
- 6) Position **Grill Plate** on top of Stack Boot to cover opening.
- 7) Periodically replace Charcoal Filter. *Filter cannot be washed.*

INSTALLATION INSTRUCTIONS HVASDK DUCTLESS CONVERSION KIT FOR OUT THE SIDE VENTING USED WITH HVA350SL, HVA350SS and HVA500SS POWER PACKS

(Consult local building codes)

- 1) Install HVA350SL, HVA350SS, or HVA500SS per installation instructions shipped with unit.
- 2) Remove aluminum filter or baffle filter and insert **charcoal filter** (HSCF124), reposition aluminum filter or baffle filter over charcoal filter and snap into place.
- 3) Connect **6" Round Flexible Metal Duct Pipe** to backdraft damper with UL listed aluminum foil duct tape. Pipe may need to be trimmed to desired length.
- 4) Connect Straight **Stack Boot** to **Flexible Metal Ducting**. Secure with UL listed aluminum foil duct tape.
- 5) Carefully bend Flexible Metal Duct Pipe and Stack Boot assembly so that it alligns with desired discharge point making sure bend is gradual and ducting is not kinked.
- 6) Measure and cut a 4" x 10" hole in right or left side of the **Chimney Extension**, positioned in line with the stack boot opening.
- 7) Install Chimney Extension.
- 8) Position **Grill Plate** over opening on side of Chimney Extension.
- 9) Periodically replace Charcoal Filter. *Filter cannot be washed.*

Follow these instructions to ensure proper mounting of Floating Shelves and to provide maximum weight capacity.

Floating Shelf Bracket Installation Instructions

Tools Needed

Measuring tape	Pencil	T10 torx drive bit
Laser level (optional)	Impact driver	#1 square drive bit
Level	T25 torx drive bit	Drill
Stud finder		

Parts Included

[2] Shelf bracket arms	[2] 1.5" self-tapping trim screws
[2] Base plates	[2] 1" self-tapping trim screws
[4] Cabinet screws	[1] 5/32" drill bit
[4] 1-5/8" trim screws	

Installation Instructions

Step 1: Using a laser level or level as a guide, draw a horizontal line on the selected wall or area at the desired installation height taking into account the thickness of the shelf. The line must be as long as the shelf that's being installed.

Step 2: Use a stud finder to find wall studs to mount your brackets on within the length of the horizontal line. Use a pencil to draw a vertical line in the center of each stud up 1" from the horizontal line.

Step 3: Place the provided adhesive mounting template on the wall where the shelf bracket will be fastened. The top edge of the template should be on the horizontal line and the vertical center line should match the vertical line on the wall.

Step 4: With an impact and a T25 drive bit, drive a cabinet screw into the lower indicator on the mounting template, leaving approximately 1/8" between the head of the screw and the wall.

Step 5: Fit the base plate on the lower screw and drive the top screw through the upper hole in the base plate.

Step 6: Lock the shelf bracket arm into the base plate.

Step 7: To level the bracket, place a level on top of the bracket arm and, using an impact with a T25 bit, rotate the bottom screw clockwise or counter-clockwise. Pitch the bracket arm up slightly to compensate for the weight of the shelf. Make sure to level the brackets with each other.

Step 8: With an impact and T10 drive bit, drive the 1-5/8" trim screws into the lower two holes in the base plate.

Repeat steps 3-8 for each shelf bracket.

Step 9: Slide the shelf onto the shelf brackets and push it firmly against the wall. Measure 2" out from the lines drawn in step 2 and use a drill with the 5/32" bit to drill to, but not through, the brackets. Use an impact with a #1 square drive bit to drive a 1" self-tapping screw (for shelves with 1/2" top thickness) or a 1.5" self-tapping screw (for shelves with more than 1/2" top thickness) through each hole and into the brackets to secure the shelf to the wall.

Follow these instructions to properly locate and attach Chimney Extension Trim Kits.

Chimney Trim Kit Installation

- Step 1: Join the three **deck molding** pieces together at the miters to create a frame and sit the assembly atop chimney hood so the outside edge of the unit overhangs the top edge of the hood by approximately 3/4". The assembled frame may need to be trimmed at the back to achieve the desired depth.
- Step 2: Locate the **decorative cove molding** underneath the deck molding and apply against the body of the range hood.
- Step 3: Stack the **chimney extension** atop the assembled trim kit and set back so approximately 3/4" of the trim kit sticks out past the chimney extension.
